

Waldenstroms

Who

- Middle Age
- F:M = 2:3
- ∅ Prominent Risk Factors
Small fraction
familial

What

Lymphoplasmacytic Lymphoma w/ monoclonal IgM

IgM

- Hyperviscosity
- Neuropathy
- Cold Agglutinins

Infiltrative Dz

- Hepatosplenomegaly
- Lymphadenopathy
- Bone Marrow infiltration
Progressive
Cytopenias
- CNS infiltration
Bing Neel Syndrome

Other

- Constitutional bx
- Iron deficiency Anemia
Hepcidin secretion
- ∅ Bony Lesions

Dx

SPEP

- Monoclonal IgM

Bone Marrow Bx

- Lymphoplasmacytic Lymphoma
w/ characteristic flow cytometry
- MYD mutation - 90%

DDx

See IgM disorders schema
