

Hemolysis - The Simple Journey

When to suspect?

Acute anemia

Elevated indirect bili (< 6)

+/- elevated AST

*See "Hemolysis - The Dx"

What next?

Smear

Reticulocyte

LDH

Haptoglobin

Let's go

DDx

Component of RBC

Membrane (H. spherocytosis)

Enzyme (G6PD def)

Hemoglobin (SCD)

Mimic

Hematoma

Extra-RBC

MAHA

AIHA

Organisms (malaria)
